PERSONAL PROJECTS

1. **Find bugs for multi language application**
   - The project involved testing a multi-language application to ensure seamless functionality, user experience, and linguistic accuracy across various regions and languages. The primary objective was to identify and report functional, visual, and content-related bugs that could affect the application's performance or usability for a global audience
2. **FT, IT and System Testing for MyBAMHNI Demo Portal**
   - The project involved comprehensive manual testing of the MyBAMHNI Demo Portal, a web-based application providing healthcare management solutions. The primary focus was to ensure seamless functionality, integration of various modules, and overall system stability to meet end-user requirements
